

# How much?

## Materials Needed

- Sales circulars from the grocery store or an office supply store
- Coins and dollars

## Directions

1. Make a list of supplies for school or snacks to pack in your lunch box.
2. Without looking at the sales circular, guess the cost of each item. Write the amount next to the item name.
3. After you make a guess for each item, check the price in the sales circular. Was your guess more or less than you estimated? Are you surprised?
4. Using coins and dollars, practice counting up to the value of an item. Try to use the least amount of coins and dollars.
5. How much would it cost if you bought two items on your list. Count money equal to that amount.

Item	Guess the price	Actual price
	\$ ____ . ____	\$ ____ . ____
	\$ ____ . ____	\$ ____ . ____
	\$ ____ . ____	\$ ____ . ____
	\$ ____ . ____	\$ ____ . ____
